

Requirements-Based Testing Project

Application:

Online Cinema Booking System

Version: 1.0

Author: Jolanta Kowalska

Date: June 2026

1. Project Overview

This project focuses on requirements-based testing for an Online Cinema Booking System.

The goal of the project is to analyse business requirements, identify requirement gaps, create test scenarios, and design test cases based on user stories and acceptance criteria.

The project simulates a real QA workflow used in Agile environments.

2. User Stories

US-001 Book a Cinema Ticket

As a customer

I want to book a cinema ticket online

so that

I can reserve a seat for a movie without visiting the cinema.

US-002 Choose a Seat

As a customer

I want to select my preferred seat

so that

I can choose where I want to sit during the movie.

US-003 Receive Booking Confirmation

As a customer

I want to receive a booking confirmation

so that

I know my ticket has been successfully reserved.

US-004 View Available Movies**As a customer**

I want to view available movies and showtimes

so that

I can choose a suitable movie and screening time.

3. Acceptance Criteria

US-001 Book a Cinema Ticket

1. Customers can book tickets for available movie screenings.
2. Customers can complete the booking using a registered account or guest checkout.
3. Customers must provide a valid email address.
4. A booking confirmation is sent after successful payment.
5. Customers can purchase up to 8 tickets in a single booking.
6. Customers must select a seat before completing the booking. The booking cannot be completed without a seat selection.

US-002 Choose a Seat

1. Customers can view available seats for the selected movie screening.
2. Unavailable seats are clearly marked.
3. Customers cannot select seats that are already reserved or unavailable.
4. Customers can select one or more seats.
5. Selected seats are clearly highlighted.
6. The number of selected seats must match the number of tickets in the booking before payment can be completed.

US-003 Receive Booking Confirmation

1. Customers receive a booking confirmation after successful payment.
2. Customers receive an updated booking confirmation after any changes to their reservation.
3. The booking confirmation includes the following information:
 - a. booking reference number,

- b. movie title,
- c. screening date and time,
- d. seat number(s),
- e. screening room number,
- f. payment method.

US-004 View Available Movies

1. All visitors can view available movies and showtimes without being logged in.
2. The system displays a movie catalogue with movie title, poster image, available dates and showtimes, age rating, and a link to view more details.
3. Customers can start the ticket booking process from the movie details page.
4. The system provides a search option so customers can search movies by title or genre.
5. The system provides filter options so customers can filter movies by genre or sort them alphabetically.
6. Customers can view detailed movie information, including a movie description and duration.
7. The system displays only upcoming movie screenings available for booking.

4. Questions for Business Analyst

US-001 Questions

1. Is ticket cancellation or booking modification supported?
2. What payment methods are available?
3. Can customers change their selected seat after booking confirmation?
4. Is account registration part of the system scope?
5. Which customer details and mandatory fields are required during the booking process besides email address?
6. Are there any seat selection restrictions, such as preventing customers from leaving a single unoccupied seat between reserved seats?
7. What happens if a customer provides a valid but incorrect email address and does not receive the booking confirmation?

US-002 Questions

1. Can customers change their selected seat after booking confirmation? If yes, are there any time restrictions or additional fees?
2. Will the system display a seating map showing rows and seat numbers?

US-003 Questions

1. Will the booking confirmation be sent by email, or will other delivery methods be available?
2. Can customers send the booking confirmation to a different email address than the one associated with their account (for example, when purchasing tickets as a gift)?
3. Will customers receive an updated confirmation email if they change the screening date or time after booking?
4. What happens if the confirmation email is not delivered successfully?

US-004 Questions

1. Will important information be displayed before booking, such as age restrictions, subtitle availability, accessibility options, or other special screening information?
2. Can customers search or filter movies by date or age rating?
3. Can visitors filter available movies by screening date?
4. What additional movie information should be displayed besides the movie description and duration?

5. Test Scenarios and Test Cases

US-001 Book a Cinema Ticket

TS-001 - Ticket Booking Validation

TC_BTC_001 - Validate booking a single ticket for an available movie screening.

TC_BTC_002 - Validate booking 8 tickets for an available movie screening.

TS-002 - Ticket Quantity Validation

TC_BTC_003 - Validate booking 9 tickets for an available movie screening.

TS-003 - Mandatory Fields Validation

TC_BTC_004 - Validate booking without providing an email address.

TC_BTC_005 - Validate booking with missing required customer details.

TS-004 - Checkout Validation

TC_BTC_006 - Validate booking using a guest checkout.

TC_BTC_007 - Validate booking using a registered account.

TS-005 - Booking Confirmation Validation

TC_BTC_008 - Validate booking confirmation after successful payment.

TS-006 - Seat Selection Validation

- TC_BTC_009** - Validate booking without selecting a seat.
- TC_BTC_010** - Validate booking 4 tickets with selecting 3 seats.
- TC_BTC_011** - Validate booking 2 tickets with selecting 4 seats.
- TC_BTC_012** - Validate booking 4 tickets with selecting 4 seats.

TS-007 - Screening Availability Validation

- TC_BTC_013** - Validate booking for a past screening.
- TC_BTC_014** - Validate booking for an unavailable movie screening.

US-002 Choose a Seat

TS-001 - Seat Availability Display

- TC_CS_001** - Validate viewing available seats for a movie screening.
- TC_CS_002** - Validate that unavailable seats are clearly marked.

TS-002 - Seat Selection Validation

- TC_CS_003** - Validate that reserved seats cannot be selected.
- TC_CS_004** - Validate that unavailable seats cannot be selected.
- TC_CS_005** - Validate selecting one available seat.
- TC_CS_006** - Validate selecting 10 seats when the maximum number of tickets is 8.
(Based on US-001 ticket limit.)
- TC_CS_007** - Validate that selected seats are highlighted.

TS-003- Seats number validation

- TC_CS_008** - Validate that the number of selected seats must match the number of tickets before payment can be completed.

US-003 Receive Booking Confirmation

TS-001 - Booking Confirmation Validation

- TC_RBC_001** - Validate that a booking confirmation is received after successful payment.
- TC_RBC_002** - Validate booking confirmation includes booking reference number.
- TC_RBC_003** - Validate booking confirmation includes movie title.
- TC_RBC_004** - Validate booking confirmation includes screening date and time.
- TC_RBC_005** - Validate booking confirmation includes a seat number for a single-seat booking.

TC_RBC_006 - Validate booking confirmation includes all seat numbers for a multiple-seat booking.

TC_RBC_007 - Validate booking confirmation includes screening room number.

TC_RBC_008 - Validate booking confirmation includes payment method.

TS-002 - Update Booking Confirmation Validation

TC_RBC_009 - Validate receiving an updated booking confirmation after making changes to a reservation.

US-004 View Available Movies

TS -001 - Movie Catalogue Validation

TC_VAM_001 - Validate that visitors can view available movies and showtimes without logging in.

TC_VAM_002 - Validate that the movie catalogue displays movie titles.

TC_VAM_003 - Validate that the movie catalogue displays poster images.

TC_VAM_004 - Validate that the movie catalogue displays available dates and showtimes.

TC_VAM_005 - Validate that the movie catalogue displays age ratings.

TC_VAM_006 - Validate that the movie catalogue displays links to view more details.

TS-002 - Booking Start Validation

TC_VAM_007 - Validate starting the ticket booking process from the movie details page.

TS-003 - Search Option Validation

TC_VAM_008 - Validate searching movies by title.

TC_VAM_009 - Validate searching movies by genre.

TS-004 - Filter Option Validation

TC_VAM_010 - Validate filtering movies by genre.

TC_VAM_011 - Validate filtering movies alphabetically.

TS-005 - Detailed Movie Page Validation

TC_VAM_012 - Validate viewing the movie description on the movie details page.

TC_VAM_013 - Validate viewing the movie duration on the movie details page.

TS-006 - Screening Dates Validation

TC_VAM_014 - Validate that the movie catalogue displays only upcoming screenings available for booking.

TC_VAM_015 - Validate that past screenings are not displayed in the movie catalogue.

6. Additional Test Ideas

TC_ATI_001 - Validate selecting multiple available seats in different rows.

TC_ATI_002 - Validate rapid clicking on a selected seat.

TC_ATI_003 - Validate booking confirmation displays all selected seat numbers when seats are located in different rows.
